PROFESSIONAL SUMMARY

Software Engineer with 6+ years of experience designing, building, testing, deploying and supporting web based software, internal tools and production systems across frontend, backend and cloud environments. Strong background in React, Next.js, TypeScript, PHP, Laravel, REST APIs, SQL and AWS, with hands on experience in system integration, debugging, release support, performance optimisation, security controls and environment management. Experienced in translating business requirements into reliable software solutions that improve maintainability, stability, usability and operational efficiency.

Core Areas: Software Engineering, Full Stack Development, Web Applications, Internal Tools, System Integration, REST APIs, SQL Databases, AWS, Testing, Debugging, Deployment, Production Support, Performance Optimisation, Technical Documentation

PROFESSIONAL EXPERIENCE

Multimedia Developer | Software and Digital Platforms, PositiveMedia, Melbourne, Australia (Feb 2026 to Present)

- Design, build, deploy and support software solutions, web applications and platform features across PositiveMedia digital products.
- Translate business and stakeholder requirements into frontend, backend, CMS and API based solutions for content delivery, campaigns and internal operations.
- Develop and improve application workflows, integrations and operational processes that support platform reliability and digital capability.
- Manage development, staging and production environments, supporting releases, uptime, debugging, issue resolution and production support.
- Maintain and optimise DNS, SSL, HTTPS, CDN, caching, security controls and performance across multiple digital properties.
- Contribute to technical documentation, release practices and continuous improvements to software delivery and platform operations.

Freelance Full Stack Developer, Melbourne, Australia (Aug 2024 to Present)

- Build and maintain business websites, internal tools and software features using React, React Native, Laravel, PHP and WordPress.
- Improve application structure, maintainability, performance and reusable component design across ongoing client projects.
- Implement API integrations, data flows, form workflows and custom functionality aligned with operational and business requirements.
- Provide troubleshooting, updates, optimisation and technical support for production systems used by small business clients.

Full Stack Developer, Reliance (Aus) Pty Ltd / I'm in the Right, Sydney, Australia (Jun 2023 to Jul 2024)

- Developed and maintained software features for customer portals, internal systems and mobile and PWA products across React, Laravel, Vue, Nuxt and Next.js.
- Improved maintainability and application stability through better component structure, cleaner code organisation and API workflows.
- Integrated legacy internal systems through REST APIs and supported end to end data and business workflows.

- Managed AWS resources including EC2, RDS and S3, and supported deployment related configuration across environments.

Full Stack Developer, Wiseberry Real Estate, Sydney, Australia (May 2022 to Jun 2023)

- Built and maintained platform features and internal tools using React, Laravel, React Native and Next.js for real estate operations.
- Supported application data models, MySQL queries and .NET based internal utilities used by the business.
- Worked in distributed teams using Git based workflows, contributing to reliable feature delivery, bug fixes and ongoing platform improvements.

Full Stack Developer, Digital House, Buenos Aires, Argentina (Mar 2018 to Jan 2022)

- Built full stack web applications and internal tools using Laravel, React, Vue, Node.js and MySQL.
- Used Nuxt and Next.js for SSR and static generation to improve performance, stability and user experience.
- Contributed to application maintenance, feature development and Agile delivery with Git based version control practices.

Web Developer, Freelance / Casual, Buenos Aires, Argentina (Nov 2016 to Oct 2019)

- Developed WordPress and PHP based websites for hospitality and retail businesses using HTML, CSS, JavaScript and Bootstrap.
- Delivered responsive interfaces, content updates and ongoing technical support for production websites.

EDUCATION

Advanced Diploma of Information Technology, Melbourne Metropolitan College (Oct 2025 to Present)

Diploma of Information Technology, Academy of Interactive Technology, Melbourne (Jan 2023 to Aug 2025)

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, PHP, SQL, HTML, CSS
Frameworks	React, Next.js, React Native, Laravel, Vue.js, Nuxt, Node.js, WordPress
Engineering	Software Engineering, Full Stack Development, REST APIs, System Integration, Web Applications, Internal Tools, Testing, Debugging, Deployment, Technical Documentation, Production Support
Data & Cloud	MySQL, PostgreSQL, AWS EC2, AWS RDS, AWS S3, DNS, SSL, CDN, Caching, Environment Management, Git, GitHub, GitLab, Bitbucket

CERTIFICATIONS

Full Stack Web Development, Digital House (Dec 2018)
Android Mobile Development, Digital House (Aug 2019)
Backend Development MERN, Coder House (Dec 2021)
React Native App Development, Coder House (Sep 2021)

WORK RIGHTS

Student Visa 500, available for part time roles in Melbourne.
